— FULL CUSTODY OF YOUR CRYPTO ASSET

*"Secure your asset and maintain control over  
your finances with CC Swap & CC Wallet"*

[www.corecustodian.org](http://www.corecustodian.org)

CORE CUSTODIAN

## ABOUT US

At **CC Swap**, we believe in empowering users with true financial freedom. Our decentralized exchange (DEX) allows you to trade directly from your wallet no central authority, no middleman, and no compromises on **security or privacy**.

**Core Custodian** (CC Wallet), offers a secure and user-friendly self-custody wallet designed to simplify cryptocurrency management. Built on the robust **Core blockchain**, our platform integrates advanced DeFi functionalities, prioritizing community, security, and innovation. Discover the ultimate solution for managing your **digital assets securely** and intuitively.

## OUR MISSION

**Core Custodian** stands for empowerment, integrity, and long-term value creation. **Our mission** is to redefine digital asset management by putting the community first — building a secure, transparent, and rewarding ecosystem where every voice matters and every contribution counts. We believe in creating **lasting impact**, not fleeting hype. Through innovation, accountability, and shared growth, we aim to bridge the gap between users and real utility in the **Web3 space**. This is more than just a project — it's a movement driven by trust, purpose, and the belief that together, we can build something **truly transformative**. Together, we rise.

## INFO

The **Core Custodian** plays a vital role in maintaining the integrity and growth of our ecosystem. As a trusted steward, the **Core Custodian** is responsible for overseeing key operations, ensuring transparency, and safeguarding the interests of the community. This role requires a deep, long-term commitment to upholding our values of accountability, innovation, and sustainable development. By actively engaging in strategic decision-making and supporting core initiatives, the **Core Custodian** helps build a resilient and trustworthy foundation. Their ongoing dedication is essential to the long-term success and credibility of the project, making them a cornerstone of our mission.

## PROBLEM STATEMENT

Tired of big promises and **DEXs** that just don't deliver on **Core**?

That's why we built **CC Swap**—no more wrapping, no more bridging. Just smooth, lightning-fast swaps made natively on Core.

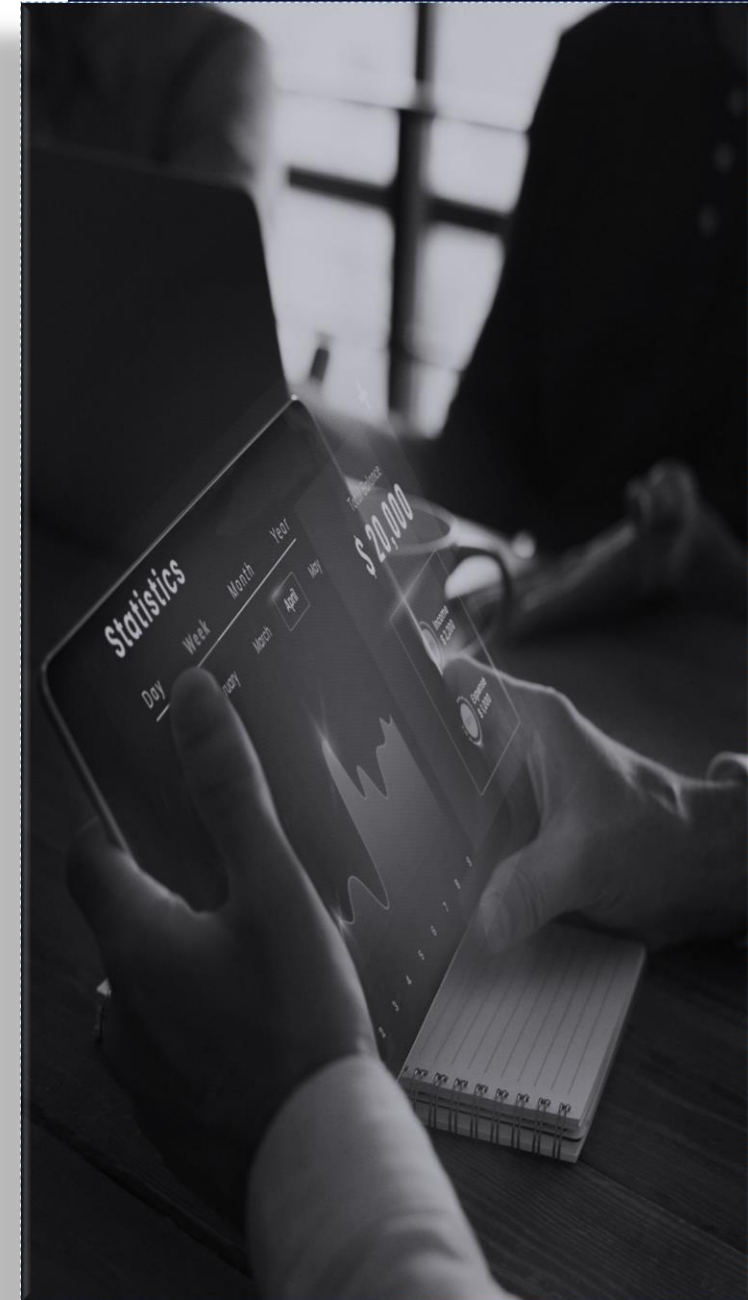

With **CC Wallet**, a secure and easy-to-use non-custodial wallet built for BTCfi, you stay in control of your assets—always. We've added **\$CCDN staking**, **LP rewards** (coming soon), and real yield opportunities—no fluff, no fake pumps.

We're solving real problems: fragmented tools, poor onboarding, and **weak liquidity**—all in one seamless platform.

**Core Custodian** isn't just another project. It's the infrastructure Core needs—built by Core believers, for **Core's future**.

## CC SOLUTION

Core Custodian offers a secure, **multi-blockchain wallet** and **decentralized exchange (DEX)** designed for complete user control and privacy. With advanced encryption and integrated DeFi features like **staking, revenue sharing, and liquidity provision**, users can manage and grow their digital assets safely and efficiently. The non-custodial platform ensures users retain full ownership of their keys and data, eliminating reliance on third parties. Core Custodian also supports seamless token swap, both in **CC Wallet & CC Swap**, multi-chain asset management, and a user-friendly interface. Built for long-term value and security, it empowers users with true financial freedom in a transparent, decentralized, and privacy-focused ecosystem.

**CC Swap DEX** is a next-generation decentralized exchange designed to deliver fast, secure, and cost-efficient token swaps across multiple blockchain networks. Built with scalability and user experience at its core, CC Swap empowers users to trade peer-to-peer without intermediaries or centralized control. Our mission is to **simplify decentralized finance** (DeFi) while providing robust infrastructure for liquidity providers, traders, and developers alike.

By combining deep liquidity, seamless cross-chain functionality, and yield-generating opportunities through staking, farming, and liquidity provision, CC Swap aims to become the cornerstone of interoperable DeFi. We offer a frictionless user interface, powerful backend architecture, and a growing suite of DeFi tools—making **CC Swap a holistic solution** for both new and experienced crypto users.

# Understanding the Vision Of CC Swap

Our vision is to build a **truly decentralized, community-driven financial ecosystem** where users retain full sovereignty over their digital assets. We believe the future of finance lies in **openness, autonomy, and accessibility**—free from gatekeepers, surveillance, and censorship. In this new financial paradigm, users are no longer passive participants but active stakeholders in shaping the rules and direction of the ecosystem.

At CC Swap, we are committed to democratizing access to financial tools that have traditionally been exclusive, complex, or geographically restricted. By removing intermediaries and leveraging blockchain technology, we empower individuals everywhere—regardless of location, identity, or background—to engage in permissionless value exchange, investment, and governance.

We envision a platform where:

👉 **Transparency is standard**, with every protocol change, fee adjustment, and treasury movement visible and verifiable on-chain.

👉 **Users are owners**, not customers—actively contributing to the growth of the platform through governance, feedback, and ecosystem participation.

👉 **Innovation is community-led**, with developers around the world contributing features, integrations, and use cases that push the boundaries of DeFi.

👉 **Interoperability is seamless**, allowing users to navigate across blockchains.

Our long-term goal is to evolve CC Swap into a **fully autonomous, cross-chain DAO**—governed entirely by its stakeholders and powered by decentralized infrastructure. This includes transitioning all critical protocol decisions to the community, managing the treasury through collective voting, and fostering a global ecosystem of partnerships, integrations, and developer contributions.

👉 **CC Swap is not just a DEX**, but a **foundation for the next generation of decentralized finance**—a permissionless, resilient, and inclusive financial layer for Web3.

# Key Features Of CC Swap – 1

## — The Decentralized Movement

### 1. Cross-Chain Swapping

CC Swap's architecture integrates advanced bridging technology and interoperability protocols to enable **cross-chain token swaps** with high efficiency and reliability.

#### Key advantages:

- 👉 **Unified interface** for multi-chain swaps
- 👉 **Support for top-tier chains**, including Ethereum, BNB Chain, Base and many other having good potential (coming soon)
- 👉 **Native asset swaps** without wrapped tokens where possible
- 👉 **Real-time routing optimization** to deliver the best prices and lowest slippage

This functionality eliminates the complexity of using multiple DEXs or bridges, saving users time, gas fees, and potential errors.

## Key Features Of CC Swap – 2

### — The Decentralized Movement

## 2. Automated Market Maker (AMM) Model

CC Swap uses a customized **AMM engine** designed to optimize liquidity and reduce impermanent loss. Unlike traditional order-book models, the AMM model allows users to trade directly with smart contract-managed liquidity pools.

### Key highlights:

- 👉 **Multi-token pools** (beyond just pairs)
- 👉 **Dynamic fee adjustment** based on market volatility and pool depth
- 👉 **Impermanent loss protection** mechanisms (for select pools)
- 👉 **Intelligent routing system** for arbitrage efficiency

Our AMM architecture encourages capital efficiency and attracts long-term liquidity providers by maximizing returns while minimizing risks.

## Key Features Of CC Swap – 3

### — The Decentralized Movement

### 3. On-Chain Governance

CC Swap is governed by its native utility and governance token, **CCDN**, enabling a decentralized decision-making process. Token holders are empowered to propose, vote, and influence key protocol developments.

**Governance features include:**

- 👉 **Proposal and voting system** for protocol upgrades, pool incentives, and treasury allocations
- 👉 **Snapshot-based governance** to prevent spam and manipulation
- 👉 **Community grant programs** for new DeFi integrations and ecosystem growth
- 👉 **Treasury management** overseen by a community-elected council

Through on-chain governance, CC Swap ensures that power remains in the hands of its users—not centralized developers or VCs.

## Key Features Of CC Swap – 4

### — The Decentralized Movement

## 4. Yield Optimization

CC Swap provides multiple avenues for users to **earn passive income** and optimize their DeFi strategy. The platform is designed to maximize capital productivity for every participant.

**Earning mechanisms include:**

- 👉 **Staking CCDN tokens** to receive governance rights and protocol rewards
- 👉 **Liquidity provision** to trading pools in return for a share of swap fees and bonus rewards
- 👉 **Yield farming** programs that incentivize users with additional CCDN or partner tokens
- 👉 **Auto-compounding vaults** for LP tokens, allowing users to maximize yield without manual reinvestment

Advanced users can access **custom strategies**, while beginners benefit from easy-to-use one-click staking and farming interfaces.

# Key Features Of CC Swap – 5

## — The Decentralized Movement

### 5. Developer and Partner Ecosystem

CC Swap is not just a DEX—it's a **DeFi infrastructure layer**. Our SDK and open APIs empower developers to build tools, dApps, and integrations using CC Swap's engine.

We support:

- 👉 **Partner liquidity programs**
- 👉 **DAO-to-DAO collaborations**
- 👉 **Educational initiatives** to bring DeFi to underserved markets

# Key Features Of CC Swap – 6

## — The Decentralized Movement

### 6. Sustainable Tokenomics

CC Swap is built on a sustainable, deflationary token model designed to incentivize long-term participation and governance.

#### Key components:

- 👉 **CCDN Total Supply:** Fixed maximum supply with transparent allocation
- 👉 **Burn mechanism:** A portion of trading fees will be used to buy back and burn CCDN tokens
- 👉 **Emissions schedule:** Gradual reduction of farming rewards to manage inflation
- 👉 **Treasury funding:** Supports ongoing development, audits, marketing, and ecosystem grants

This structure encourages holding and staking while aligning the incentives of all stakeholders.

# **CORE CUSTODIAN**

## **CC WALLET OVERVIEW**

### **MULTI-BLOCKCHAIN SUPPORT**

Manage multiple cryptocurrencies within a single wallet.

### **MULTI-SIG WALLET**

Enhanced security through multi-key authorization.

### **WEB3 DOMAIN**

Complete decentralization for extreme privacy and security with CC wallet.

### **SECURITY**

Advanced encryption, smart contract audits, 2FA, and biometric security.

**FEATURES**

## CORE CUSTODIAN WALLET FEATURES

Core Custodian is coming up with DEX aggregator that employs algorithms and smart order routing techniques powered by artificial intelligence (AI).

It consolidates liquidity across an entire chain to identify optimal trading paths, effectively maximizing trading efficiency.

It capitalizes on arbitrage opportunities for users by routing trades across all tokens and liquidity pools, including taxed tokens.

## CORE CUSTODIAN

# FUTURE DEVELOPMENTS

1

### Web3 Domains

We all know about our public address and it is very hard to remember them. In CC Wallet, we're introducing a feature that simplifies receiving funds with a memorable address like "Alex.core" instead of a complex public address. If "Alex.core" is already taken, alternative suggestions like "Alex1.core" or "Alex5.core" will be suggested, ensuring every user can have a unique, easy-to-remember address. This feature enhances user convenience by eliminating the need to share long, complex addresses. Funds sent to these custom address will automatically be routed to the corresponding wallet, making transactions simpler and more user-friendly in the crypto space.

## CORE CUSTODIAN FUTURE DEVELOPMENTS

2

### Smart Accounts

In CC Wallet, users can set advanced conditions like using a Multi-sig wallet, requiring two or more private keys to operate to enhance security. Additionally, users can automate actions based on market conditions, such as swapping funds to Core when for ex. Core price reaches \$1. This flexibility allows users to integrate AI or custom rules, enabling automated responses to predefined conditions. These features provide users with powerful tools to manage their assets securely and efficiently, making CC Wallet a versatile solution in the evolving crypto landscape.

## CORE CUSTODIAN

# FUTURE DEVELOPMENTS

### 3 Login

With CC Wallet, users can easily transfer their wallet to a new phone without needing their Seed Phrase. Instead of the traditional recovery method, we're introducing a feature that allows users to log in to their wallet via Gmail. This simplifies the process, ensuring a seamless experience when setting up the wallet on a new device. By eliminating the need to remember or securely store a Seed Phrase, we enhance both convenience and security, making account recovery straightforward and user-friendly while still maintaining strong protection for your assets. Though Passphrase will always be there.

## — REVENUE GENERATION STRATEGY

Core Custodian plans to generate revenue primarily through transaction fees. In addition, the company intends to diversify its revenue streams by introducing a range of future products. The first of these new offerings will be a wallet & Dex, which marks the beginning of our product expansion strategy. By broadening our product portfolio, Core Custodian aims to create additional sources of income and enhance our market presence. This strategic move is designed to ensure sustainable growth and provide users with a variety of valuable solutions, reinforcing the company's commitment to innovation and long-term success in the industry.

# BLOCKCHAIN TECHNOLOGY

Built on Core Chain, leveraging the latest blockchain advancements with Core as the default blockchain. CC wallet will expand to none EVM chains in the nearest future

Advanced encryption, regular security audits, and protocol updates ensure robust asset protection.

# TOKENOMICS

Total Supply: 50 Million Tokens

👉 Fair Launch and Liquidity Pool (LP): 60%

👉 Development: 10%

75% locked for 1 year

10% released monthly thereafter

👉 Marketing: 5%

50% locked for 6 months

10% released monthly thereafter

👉 Staking and Farming Rewards: 15%

No lock-up period

👉 Community Rewards: 5%

25% locked for 6 months

10% released monthly thereafter

👉 Team Tokens: 5%

100% locked for 1 year

10% released monthly thereafter

# ROADMAP | PHASE 1

1

## COMMUNITY BUILDING

Host events and webinars to provide education on using the wallet.

2

## COLLABORATIONS

Form alliances with key influencers and other projects within the core blockchain ecosystem.

3

## MARKETING CAMPAIGN

Initiate a global marketing campaign to promote the wallet and attract new users.

4

## \$CCDN TOKEN LAUNCH

The launch of our utility token \$CCDN.

# ROADMAP | PHASE 2

1

## USER INCENTIVES

Implement reward programs and referral bonuses to incentivize user participation and growth.

2

## BETA VERSION RELEASE

Launch the beta version of the CC Wallet to a select group of users for initial testing and feedback.

3

## USER EXPERIENCE ENHANCEMENTS

Improve the wallet interface based on user feedback for a more seamless experience.

4

## MULTI-BLOCKCHAIN SUPPORT

Expand support for additional blockchain networks beyond Core Blockchain.

5

## DEFI INTEGRATION

Introduce advanced DeFi functionalities, including staking, lending, borrowing, and yield farming.

# ROADMAP | PHASE 3

1

## SECURITY AUDITS

Conduct comprehensive security audits to ensure the safety and integrity of the wallet.

2

## PARTNERSHIPS

Establish partnerships with other blockchain projects and DeFi platforms to enhance the wallet's ecosystem.

3

## COMMUNITY INVOLVEMENT

Increase community involvement through forums, social media, and regular updates.

# ROADMAP | PHASE 4

1

## GLOBAL USER AQUISITION

Focus on acquiring users from diverse geographical regions through targeted campaigns.

2

## INNOVATION AND DEVELOPMENT

Continue to innovate and develop new features based on emerging trends and user needs.

3

## SECURITY ENHANCEMENT

Regularly update security protocols to protect against new threats and vulnerabilities.

# ROADMAP | PHASE 5

1

## ONGOING IMPROVEMENT

Maintain a continuous cycle of feedback and improvement to ensure the wallet remains cutting-edge.

2

## LONG-TERM VISION

Develop and share the long-term vision for Core Custodian, including potential expansions and new functionalities.

## — CC FUNDING

# CC FUNDING PROGRAM

Core Custodian welcomes funding for product development, marketing campaigns, and global expansion initiatives. Details on specific funding needs and financial projections will be provided upon request.

# Security Highlights

**CC Swap** and **CC Wallet** are scheduled to undergo comprehensive security audits in the near future as part of our ongoing commitment to maintaining the highest standards of safety and reliability. While we are proud to report that no **security issues or bugs** have been identified in our products to date, we believe in taking a proactive approach to ensure long-term integrity and user trust. These audits will reinforce our platform's robustness and further validate the confidence our community has placed in us. At **Core Custodian**, security is not optional—it's a **foundational principle** we uphold at every stage.
